PROFESSIONAL SUMMARY

Full Stack Developer specializing in React, django, django-restframework with proven experience in optimizing backend systems and database performance. . Focused on building scalable, reliable systems and efficient APIs.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3
Backend: Django, Django-restframework, RESTful APIs
Frontend: React, Bootstrap, HTML5
Database: MySQL, PostgreSQL, SQLite, Redis
Cloud & DevOps: Docker, Git, GitHub

Technical EXPERIENCE

Developed full-stack web applications using **Django + React**
Designed REST APIs and handled client-server communication
Managed form submissions, validation, and database operations
Implemented responsive UI/UX for better usability
Used Git & GitHub for version control

PROJECTS

Email scheduling - send emails on certain intervals asynchronously | [GitHub](#) Dec 2025 - Jan 2026 Django, Docker, celery, Redis

A Platform that allows users to send scheduled email in real-time, helping reduce complexity .

Built an email scheduling process that will send email asynchronously using celery and cache memory as redis for fast performance and containerized it with docker for conflicts management

Full JWT authentication system | [GitHub](#) Oct 2025 - Feb 2026 Python, Django, React-js, Django-restframework, Db sqlite3, RESTful APIs

A platform that provides a secure ,scalable, and production based auth system with email verification

Provide a secured authentication system with registration,login.activation,password reset, and logout features, properly tokenized with access and refresh tokens for session validation.. For secured serve-side validation and APIs django-restframework and for client side scripting react js are used

Function Based CRUD operation | [GitHub](#) Aug 2025 - Sept 2025 Django, Django-restframework,Postman

A platform that provide the CRUD operations of the restful APIs

Implement CRUD (Create, Read, Update, Delete) operations using Django and Django REST Framework (DRF). The project provides RESTful APIs for managing resources, making it easy to integrate with frontend applications or other services.

CERTIFICATIONS & ACHIEVEMENTS

• **HTML & CSS Training (1 Month) — Hub IT Training, Butwal Multiple Campus, 2079 B.S. (1st Semester)-**

Built responsive web pages using HTML5/CSS3 and basic layout techniques. Practiced forms, UI components, and clean styling for template-based website

EDUCATION

BSC.CSIT in Computer Science

Butwal Multiple Campus, Butwal

Final Year Project: Hospital management system - Intelligent symptom-Based disease detection Assistant with 96% accuracy, serving doctors based on disease prediction
2079 BS - running
